## SUMMARY OF QUALIFICATIONS

---

- Proficient in Python for data mining and predictive analytics, using machine learning and sentiment analysis to identify key market trends and inform data-driven decisions.
- Skilled in SQL for data extraction and management to ensure high standards of data integrity.
- Expertise in automating repetitive tasks and data workflows using Power Automate and Power Apps.
- Experience in creating dynamic visualizations using Power BI, Tableau, and Excel to translate complex model outputs into actionable campaign insights.
- Native Bilingual Proficiency in English and French.

## EDUCATION

---

**Business Analytics** (Ontario Graduate Certificate) May 2026 (Expected)  
Seneca Polytechnic, Toronto, ON | GPA: 4.0

**Computer Sciences – Web Services and Applications** (Bachelor's Degree) 2023  
Concordia University, Montreal, QC

## PROFESSIONAL EXPERIENCE

---

**Technical Project Coordinator – (Contract/Part-time)** Jan 2026 – Present  
Mindfield Consulting, Remote

- Independently developed an autonomous AI agent using Claude Code and machine learning to create and optimize WordPress content, saving 3 hours of manual effort per post while maximizing impressions.
- Mobilized technical teams and implemented rigorous tracking for Moodle deliverables, ensuring all project milestones were met on time and within budget.
- Performed hands-on troubleshooting and functional testing within the Moodle platform to resolve technical issues, resulting in validated system performance prior to final client hand-off.
- Conducted detailed business analysis to define client needs and collated technical effort estimates, providing sales teams with high-accuracy data for commercial quotes.
- Facilitated scoping sessions between customers and designers to gather requirements, maintaining transparent communication that aligned project status with stakeholder expectations.

**Process Automation Developer – (Contract/Full-time)** Jan – May 2025  
Siemens Canada, Oakville, ON

- Identified operational bottlenecks and engineered custom Power Automate solutions, successfully transforming manual redundancies into streamlined, self-running processes.
- Utilized Excel and Power Query to perform comprehensive data cleansing, leveraging complex formulas to automate the standardization of raw information for immediate analysis.
- Developed interactive Power BI dashboards to analyze workforce composition, enabling stakeholders to identify key patterns and reach data-driven logical conclusions.
- Established data tracking systems within SharePoint and Microsoft Lists, optimizing storage architecture to ensure accurate record-keeping and streamlined information retrieval.
